

SPRING BOOT

SINGLETON EXAMPLE:

```
package com.example.ScopeApp;

import org.springframework.context.annotation.Scope;
import org.springframework.stereotype.Component;

@Component 4 usages
@Scope("singleton") //singleton default
public class ScopeEgSingleton {
    String name; 3 usages
    public void show(){ 2 usages
        System.out.println("Name: "+name);
    }
}
```

SINGLETON APPLICATION:

```
package com.example.ScopeApp;

import org.springframework.boot.SpringApplication;
import org.springframework.boot.autoconfigure.SpringBootApplication;
import org.springframework.context.ApplicationContext;

@SpringBootApplication
public class ScopeAppApplication {

    public static void main(String[] args) {

        ApplicationContext context =SpringApplication.run(ScopeAppApplication.class, args);

        ScopeEgSingleton sing1 = context.getBean(ScopeEgSingleton.class);
        sing1.name = "Anu";
        ScopeEgSingleton sing2 = context.getBean(ScopeEgSingleton.class);
        sing2.name = "Abi";
        sing1.show();
        sing2.show();
    }
}
```

PROTOTYPE EXAMPLE:

```
package com.example.ScopeApp;

import org.springframework.aop.aspectj.annotation.PrototypeAspectInstanceFactory;
import org.springframework.context.annotation.Scope;
import org.springframework.stereotype.Component;

@Component no usages
@Scope("prototype")
public class ScopeEg {
    int age; 1 usage
    public void display(){ no usages
        System.out.println("Age: " + age);
    }
}
```

PROTOTYPE APPLICATION:

```
package com.example.ScopeApp;

import org.springframework.boot.SpringApplication;
import org.springframework.boot.autoconfigure.SpringBootApplication;
import org.springframework.context.ApplicationContext;

@SpringBootApplication
public class ScopeAppApplication {

    public static void main(String[] args) {

        ApplicationContext context =SpringApplication.run(ScopeAppApplication.class, args);
        ScopeEg s1 = context.getBean(ScopeEg.class);
        s1.age = 22;
        ScopeEg s2 = context.getBean(ScopeEg.class);
        s2.age= 24;
        s1.display();
        System.out.println(s2.age);
    }
}
```
