

SQL QUERIES PRACTICE

```
create database supermarket_db;
```

```
use supermarket_db;
```

```
create table stock_management (p_id int, p_name varchar(30),  
p_price int, p_stock int);
```

```
insert into stock_management values(103, 'Bottle', 80, 100);
```

```
select * from stock_management;
```

Result Grid

Filter Rows:

	p_id	p_name	p_price	p_stock
▶	110	paneer	50	20
	109	butter	50	20
	108	bread	40	30
	107	Chips	20	40
	106	Milk	35	80
